# **Large Capacity** -30°C **Biomedical Freezer**

# Typical Installation and Application

For use in blood banks, hospitals, research institutions, electronics, chemical and other industries, for the preservation of plasma and biological products and cryogenic test of components and materials.

**Energy efficient hydrocarbon (HC) refrigeration system** Optimised refrigeration system, utilising high-efficiency HC compressor significantly reduces energy consumption.

#### Greener by design

HC refrigerants are natural non-toxic and more environmentally riendly than HFC refrigerants. This alongside the HC compressor echnology and LBA foamed polyurethane insulation layer, make this unit greener and in-line with European ROHS directives and environmental protection guidelines.

#### Large capacity, superior uniformity

Built-in evaporator for faster cooling speed and uniform temperature throughout the cabinet,  $\pm 3$  C. Large internal space with adjustable shelves for flexible configuration.

# Low noise

Optimised system and cabinet design ensures low noise emissions, less than 44dB.

# Qingdao Haier Biomedical Co.,Ltd.

DW-30L818

Haier

Brand Building, Haier Industrial Park, No.1Haier Road, Qingdao, 266101, P.R.China Tel: +86-0532-88935955 Website: www.haiermedical.com

#### Easy to clean and corrosion resistant

Electric zinc plate powder sprayed internal liner and large round corner design and coated steel plate exterior design ensure reliable corrosion prevention which is easy to clean.

## Microprocessor control system

- Microcomputer electronic thermostat, LCD temperature display, display precision 0.1 °C, inside temperature set point -10~-30 °C (adjustable).
- Multiple alarm functions including high temperature alarm, low temperature alarm, sensor fault alarm, power off alarm, open door alarm, high ambient temperature alarm.
- Sound and light alarm mode can be connected to a remote alarm interface.
- Battery backup alarm function operates continuously for >24hr in the event of a power outage.
- Standard configuration: RS485 port.
- Optional USB interface, printer and temperature logger.

#### Superior thermal insulation performance

70mm super thick insulation layer design, double door seals plus three inner doors, superior thermal insulation and energy saving effect.

#### Porthole

Portholes as standard, allows for independent testing of cabinet temperature.

## Security lock

Built-in lock and padlock available, convenient and safe for multiple users or independent management as needed.

## Chart recorder

Optional chart recorder for temperature records.
